2011 Tate Springs Road, Lynchburg, VA 24501
Phone: 434.947.3963 **Fax:** 434.947.5935

Sleep Medicine

Centra Home Sleep Testing Center

Effective November 2024, the Centra Medical Group (CMG) Sleep Wellness Center launched the Centra Home Sleep Testing Center. The American Academy of Sleep Medicine (AASM) accredited center is staffed by board-certified sleep medicine physicians, trained APPs, and licensed sleep center staff, this new center combines the home sleep testing programs of the Centra Sleep Disorders Center at Virginia Baptist and the former Lynchburg Pulmonary Sleep Wellness Center. The Centra Virginia Baptist Sleep Disorders Center will continue to offer in-lab/overnight sleep studies at the Centra Virginia Baptist Hospital (VBH) location.

How to Refer:

***Please note, providers at Centra Home Sleep Testing Center can follow the referred patient for their sleep disorders or if referring provider prefers to manage the patient, the results can be sent to referring provider's office**

Inpatient (Centra/CMG Providers & Hospitalists):

Continue to use the Home Sleep Test order set in Cerner. Please review the Home Sleep Test contraindications carefully and be sure to select the appropriate screening criteria to proceed with the order.

***If patients are DDD pacemaker dependent, an in-lab study should be ordered.**

Outpatient (External Providers):

***Click here to view the [Home Sleep Test Order Documents](#)**

Call or send a referral via fax for the following location:

- Centra Home Sleep Test Center
2512 Langhorne Road, Lynchburg, VA 24501
Phone: 434.528.2194 **Fax:** 434.200.3183

Tiffany Clark, RN, MSN, ACNS-BC, FNP-C, AOCNP, from the Centra Alan B. Pearson Regional Cancer Center Hematology team, will be joining us for the January edition of Centra’s Lunchtime Learning Series. She will discuss the diagnosis and medical management of hematological disorders in primary care. Click [here](#) to register.

Atrial Fibrillation (A. Fib) / Flutter Emergency Department Pathway

Cardioversion Caveats

- If onset is unknown, patient is not on therapeutic OAC and is hemodynamically stable, then recommend TEE prior to DCCV.
- If onset is less than 48 hours, reasonable to consider cardioversion.
- Appropriate to cardiovert without TEE if patient has been compliant with therapeutic anticoagulation since, or prior to, onset.

Initiation of Oral Anticoagulation:

- If a patient has a CHA₂DS₂-VAS_c score of ≥2, consider initiation of OAC, such as Eliquis, Xarelto, Pradaxa or Warfarin.
- If a patient requires a cardioversion, regardless of CHA₂DS₂-VAS_c score, initiate OAC for at least 4 weeks.

The Emergency Department Atrial Fibrillation (A. Fib) / Flutter Pathway streamlines care for patients with atrial fibrillation or flutters, focusing on hemodynamic stability, rate control, anticoagulation, cardioversion considerations, CHF management, and referral to the A. Fib Clinic for follow-up care.

How to Refer:

Scheduling new patient appointments within a week. Call or send referral via fax or through the Referral Management System in Cerner for the following location: ****When referring, please note "AFib Clinic" on referral***

- Centra Heart & Vascular Institute - Lynchburg
2410 Atherholt Road, Lynchburg, VA 24501
Phone: 434.200.5252, option 3, ask for the EP AFib clinic scheduler **Fax:** 434.200.2496

Click here to learn more about the clinic: [Atrial Fibrillation | Centra Health](#).

Fax: 434.200.4553

Vitamin K Shot Administration for Newborns

Centra has seen an increase in the refusal rates for the Vitamin K shot over the past year. The shot is crucial for newborns as it helps prevent bleeding disorders by enabling the body to produce essential clotting factors. Without it, infants are at risk for a serious condition known as Vitamin K Deficiency Bleeding (VKDB). To learn more about the benefits of the Vitamin K shot and helpful talking points, click here, [Vitamin K Shot Clinical Talking Points](#).

SURGICAL SERVICES

Gastroenterology

New Procedures / Technology:

Centra Medical Group (CMG) Southside Gastrointestinal Center in Farmville has begun offering a technology called Fibroscan. This technology is used to determine the prognosis of a patient diagnosed with fatty liver disease. When a patient is referred for a Fibroscan, the patient will have an office visit with the nurse practitioner for management of fatty liver disease.

Referral Criteria: ****Please note, a patient does not need to be established for a Fibroscan referral***

- Diagnosed fatty liver disease
- Liver profile that has been completed within one month ****please send with the referral***
